## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a circuit for control of an output current in an active biological control reaction system, classified in class 702, subclass 116.
- II. Claims 15-20, drawn to a circuit for control of an output in a multiple unit cell array, classified in class 702, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Group I and II are distinct because the invention of Group I is directed to a control circuit with row and column selection transistors without any specifics as to what is being controlled other than the need for rows and columns. The Group II invention also has row and column select transistors but is directed to the control of a unit cell type array with unit cells including a return electrode. Such a return electrode in particular limits the primary disposition of any electric fields to within the unit cell where the field is produced between some type of output electrode and said return electrode. Also, Group II is specific for array control which is not stated in any Group I claims. Thus, the control circuits of Group I and II are distinct in that they are directed to controlling different reaction system arrangements.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)).
